

Back in Stock! Oval window front fenders!

Just received three containers SWT...

We will not wine about the crazy shipping cost, but more important we had a load of our latest production oval window fenders in this shipment....

Ready available from our stocks now, don't miss out!

Off course plenty of other Silver Weld Through metal parts came in at once, several new products (watch our Friday News) and some backorders as well....

3 x 40' containers at once is a lot of parts, believe me!
